PROFILE

Fresh graduate in Information Technology with hands-on experience in technical documentation, system testing, and creating clear and user-friendly system manuals. Knowledgeable in troubleshooting, database management, web development, and basic software development. A detail-oriented and fast learner with strong problem-solving and communication skills, eager to apply technical knowledge, gain professional experience, contribute to a team, and deliver accurate, high-quality work.

EDUCATION

City of Malabon University

Bachelor of Science in Information Technology

Malabon City

Sept, 2022 - June 2026

WORK EXPERIENCE

Doña Alejandra Incorporated

Technical Documentation Intern

Diliman, Quezon City, 1103 Metro Manila

Jan 2026 - April 2026

- Created clear, user-friendly manuals and documentation to support system implementation and end-user training.
- Developed step-by-step user guides, standard operating procedures (SOPs), and system documentation for internal use.
- Translated complex technical processes into simple, easy-to-follow instructions for non-technical users.
- Reviewed and updated documentation to maintain accuracy, consistency, and usability throughout system implementation.

PROJECT

Lead Full Stack Developer

Oct 2025

Captone Project- SmartWash: AI-Powered Laundry Booking and Tracking System with Predictive Time Estimation

- Django Web Application — Built a full-stack appointment booking system with Tailwind CSS, PostgreSQL, JWT authentication, reCAPTCHA, and PayMongo payment integration (GCash/Maya/Credit Card).
- Machine Learning Integration — Developed a Random Forest Regressor (scikit-learn) to predict laundry service time, achieving practical accuracy; serialized with joblib and served via Django backend.
- Auto-deployment on Render — Configured render.yaml and build.sh for automated dependency installation, database migrations, and data seeding on each git push.

SKILL

- Proficient in Microsoft Office, HTML, CSS, JavaScript, Python, Django Framework, PostgreSQL, Tailwind CSS, scikit-learn, Git, and GitHub.
- Experienced in full-stack web application development, machine learning model development and deployment, payment gateway integration (PayMongo), user manual creation, database management, troubleshooting, and providing technical support.
- Knowledgeable in web development, machine learning, database management, cloud deployment (Render), REST API integration, software troubleshooting, version control, and technical documentation.
