PROFILE

Detail-oriented Information Technology student with hands-on experience in technical documentation, creating clear and user-friendly system manuals to support system implementation and end-user adoption. Skilled at translating technical processes into easy-to-follow documentation with strong attention to detail. A fast learner with strong problem-solving and communication skills, eager to apply my technical knowledge, contribute to a team, and deliver accurate, high-quality work.

EDUCATION

City of Malabon University

Bachelor of Science in Information Technology

Malabon City

Sep 2022 - June 2026

PROJECTS

Lead Full Stack Developer

Captone Project- SmartWash: AI-Powered Laundry Booking and Tracking System with Predictive Time Estimation | Oct 2025

- Developed a web-based laundry booking and tracking system using Python (Django), HTML, CSS, JavaScript, and MySQL.
- Designed and implemented user and admin dashboards for appointment scheduling and system management.
- Integrated AI-powered predictive time estimation to improve laundry service efficiency.

WORK EXPERIENCE

Doña Alejandra Incorporated

Technical Documentation Intern

Diliman, Quezon City, 1103 Metro Manila | Jan 2026 - April 2026

- Created clear, user-friendly manuals and documentation to support system implementation and end-user training.
- Developed step-by-step user guides, standard operating procedures (SOPs), and system documentation for internal use.
- Performed system validation to verify documentation matched actual system functionality.
- Simplified complex technical concepts into easy-to-understand instructions for non-technical users.

SKILLS

- User Manual Creation, Database Management, Troubleshooting & Technical Support, Microsoft Office
- HTML, CSS, JavaScript, Python, Django Framework, Git & GitHub
